# WORKSHEET 1: THE PROMPT LAB

CEO of Superintelligence Workshop -- 2nd Year Edition | Time: 20 min | Individual

## Part A: Understanding the Basics (5 min)

### 1. Fill in the blanks:

An LLM predicts the most likely _____ based on patterns in its _____ data.

The two types of messages you send to an AI are:

* _____ message -> Sets the AI's personality and rules
* _____ message -> Your actual question or input

Temperature controls how _____ vs _____ the AI's response is.

* Temperature 0 = _____
* Temperature 1 = _____

### 2. True or False:

| Statement | T / F |
|---|---|
| ChatGPT browses the internet in real-time to answer your questions | |
| A system prompt can make the same AI act like completely different people | |
| "Explain Python" and "You are a patient teacher. Explain Python to a 10-year-old" give the same output | |
| AI understands and "thinks about" your question like a human would | |
| Adding "Think step by step" to a prompt can improve the response quality | |

## Part B: Prompt Makeover Challenge (10 min)

Take each bad prompt and rewrite it as a great prompt using the 5 rules (Role, Specificity, Structure, Examples, Iteration).

### Bad Prompt 1:

*"Tell me about machine learning"*

**Your improved prompt:**

Rules used (circle): Role / Specificity / Structure / Examples

**Bad Prompt 2:**

*"Write code for sorting"*

**Your improved prompt:**

Rules used (circle): Role / Specificity / Structure / Examples

**Bad Prompt 3:**

*"Help me with my resume"*

**Your improved prompt:**

Rules used (circle): Role / Specificity / Structure / Examples

## Part C: System Prompt Design (5 min)

Write a system prompt for each scenario. Be specific about personality, tone, and rules.

**Scenario 1: A study buddy for DSA**

**Scenario 2: A college fest event planner bot**

## [trophy] BONUS CHALLENGE

Write the FUNNIEST system prompt you can think of. Test it on the workshop tool. If it makes your neighbor laugh out loud, you win bragging rights!

**Your funny prompt:**

**Best line from the AI's response:**

## [v] Self-Check

Before you move on, can you:

- [ ] Explain what a system prompt does in one sentence?
- [ ] Name 3 of the 5 prompt engineering rules?
- [ ] Write a prompt that gets a SPECIFIC, STRUCTURED response?
- [ ] Explain what temperature does?

**You're ready for the next module! [rocket]**
